

## **COVID-SAFE KNIFE SHARPENING**

During these trying times, we are forced to stay at home more than we might want. Colorado Knife Sharpening is proud to do all we can to make your stay-at-home experience as unstressful as possible. We all know there's nothing worse than dull kitchen knives when you have to cook at home. We will bring our mobile service vehicles to your home or business and service your knives on the spot.

To be as safe as possible for us as well as you:

- We cannot enter your home or business. When we arrive for your appointment, you must bring your knives out to us.
- While we service your knives, you wait in the comfort of your home or business. When your service is complete, you will come to our vehicle to pick your knives up and process your payment.

When dropping off and picking up your knives, we will always maintain safe separation and wear masks.
